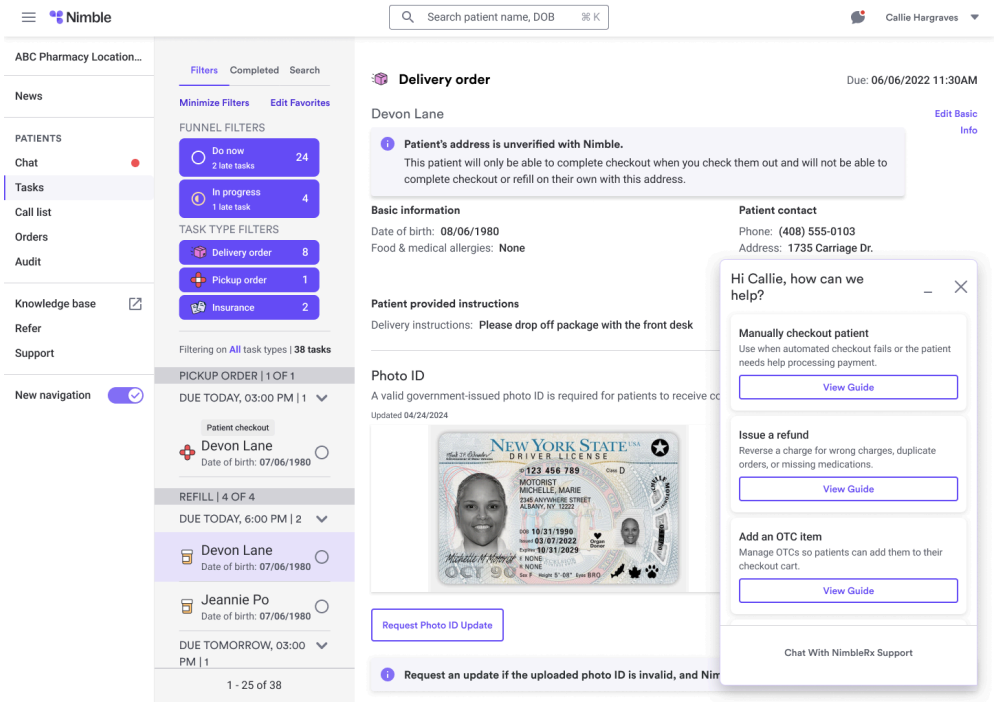
Meet Mira AI: NimbleRx's Vision for the Future

The healthcare landscape is rapidly evolving, with Artificial Intelligence (AI) at its core. At NimbleRx, we're harnessing AI to redefine how pharmacies operate, how consumers manage their health, and how pharmaceutical companies connect with their audience.

The Pharmacist's New Best Friend: AI Transforms Workflows

Pharmacists are vital, but administrative tasks often pull them from patient care. AI solutions are streamlining operations:

- **Prior Authorization:** A major time-saver, AI analyzes data to determine eligibility and streamline PA submissions, significantly reducing delays (often two hours or more daily for pharmacists).
- **Optimized Medication Management:** AI enhances patient safety by identifying potential drug interactions and discrepancies in medication profiles for pharmacist review.
- **Streamlined Customer Support with Mira AI:** Mira AI also acts as a crucial AI assistant for pharmacies. By handling common patient inquiries, it frees up pharmacy staff, allowing them to focus on complex patient needs and dispensing. This boosts patient engagement, leading to improved adherence and stronger pharmacy relationships.



Smarter Outreach: AI Reshapes Pharma Marketing & Engagement

Effective communication is crucial in pharmaceuticals. AI is revolutionizing how the industry connects for greater impact:

- **Precision Messaging:** AI uses de-identified data to understand what patients need, then creates and sends personalized messages through apps, text messages, and email - at the right time for maximum impact.
- **Supercharged Ad Targeting:** AI helps you find the right patients and healthcare providers to target, using data to predict who's most likely to engage. It improves ad performance in real time and keeps messaging consistent across all channels, creating a smoother experience for your audience.

The NimbleRx AI Advantage: A Truly Patient-Centric Future

Mira AI empowers patients with quick, personalized, and secure health support, laying the foundation for a smarter, more connected pharmacy experience.

- **Quick Answers to Health Questions:** Get immediate, reliable answers about your health and medications. Mira AI uses your de-identified medication history for highly relevant insights and supports multiple languages.
- **Safety & Security:** Built with strong safeguards, Mira AI only answers health-related questions. All data is de-identified and HIPAA compliant, with clear disclaimers that responses are for information only, not medical advice.
- **The Future Health Coach:** Mira AI is evolving towards a comprehensive AI Health Coach, offering a seamless way for patients to track their medications and symptoms, personalized plans for diet and exercise, and smart reminders to integrate wellness seamlessly into your daily life.
